Smooth Fiberglass WAT-480 doors.

Codel Fiberglass Doors Distinct Features

The Fiberglass door from Codel is virtually maintenance free and offers a limited lifetime warranty. Unlike other brands of fiberglass doors that offer only wood edges, the Codel Fiberglass door is manufactured with composite edges as well as composite top and bottom rails, leaving no exposed wood. The Codel fiberglass door has a clean appearance, with radius mortised hinge preps instead of swiping completely through the door edge. With the harsh Pacific Northwest climate, we believe this all-composite Fiberglass door will give years of satisfaction.

Attractive Flush Glazing
Creates a crisp, contemporary appearance. (Optional)
Lite plugs installed in standard lite kit frames.
(*Lite kit shown not flush glazed.)

JambGuard™
Heavy duty steel reinforcement plate for added protection and security.
(*Not on sidelite or double units.)

Premium High Dam Sill
Provides an improved barrier against air and water intrusion.

Seams-Rite™ Nailing Flange
Seams-Rite™ is an innovative hidden fastener eliminating unsightly nail holes and provides a barrier to water intrusion.
(Standard on WeatherGuard Jamb only)

The nailing flange allows the door to be installed without damaging finished jamb facings.
(Optional)

Finishing Touch
Enhance the beauty and value of your door with any of our quality coatings, for a completely finished & ready-to-install door system. (Optional)

Cougar paint

LIMITED LIFE TIME WARRANTY

Unfinished Smooth Fiberglass

WeatherGuard™
A unique low maintenance poly-fiber doorframe system that outlasts wood jambs. Does not wick moisture, splinter or rot. (Optional)

LVL Stile
Continuous 3-1/4" lock block extending the full length of the lock-side, keeping the door from bowing and improves security.

Corner Seal
Added protection against water and air infiltration.

High Performance Sweep
Provides a tight seal against drafts.

High Density Polyurethane Foam
Provides 5 times the insulation value of wood doors.

HydroShield™ Technology
Composite framework seals out moisture and eliminates rot and deterioration.

What's Inside DOES Make A Difference

CODEL ENTRY SYSTEMS Fiberglass Door

FEATURES	BENEFITS	CODEL ENTRY SYSTEMS	Others
1 Hydroshield Technology Composite Edge Perimeter (No Exposed Wood)	Seals out moisture, greatly reducing its damaging effects such as rotting, bowing and delamination, providing a <i>longer lasting</i> and <i>better performing</i> door over the years.	✓	N/A
2 Heavy Duty Full Length Lock Block (LVL) Laminated Veneer Lumber	Greater <i>strength</i> and <i>stability</i> built into the latch side of the door for sturdy support for hardware and other security features, as well as improved resistance to bowing.	✓	N/A
No Paint Required Limited Lifetime Warranty	Because Codel fiberglass doors are designed with <i>Hydroshield Technology</i> , doors are not finished, but painting is not required to maintain the warranty.	✓	N/A
3 Polyurethane Foam Core (100% CFC Free)	Provides greater insulation and energy efficiency than wood doors.	✓	✓
4 Fiberglass Skin	Fiberglass skins won't rot like wood doors or dent like steel doors.	✓	✓

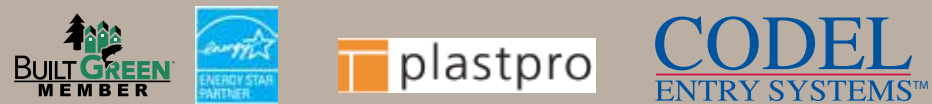

*The information noted represents the majority of the doors we offer, however, there are some exceptions.

CODEL ENTRY SYSTEMS™

Smooth & Textured Fiberglass EZ-Fit "Retro Sized" Swinging Patio

Codel's EZ-Fit swinging Patio System is a retro-sized unit created as a replacement for that worn out aluminum sliding door, which makes it ideal for remodel projects. Available as either an inswing or outswing unit, the hinged operation eliminates security and performance problems often experienced with traditional sliding patio doors.

Codel's EZ-Fit swinging Patio System is manufactured completely prehung, with an installed retractable screen, in your color choice of either white or bronze.

CODEL ENTRY SYSTEMS™

Smooth & Textured Fiberglass New Construction Swinging Patio

Codel's New Construction swinging Patio System is an attractive alternative to wood or vinyl sliding patio doors.

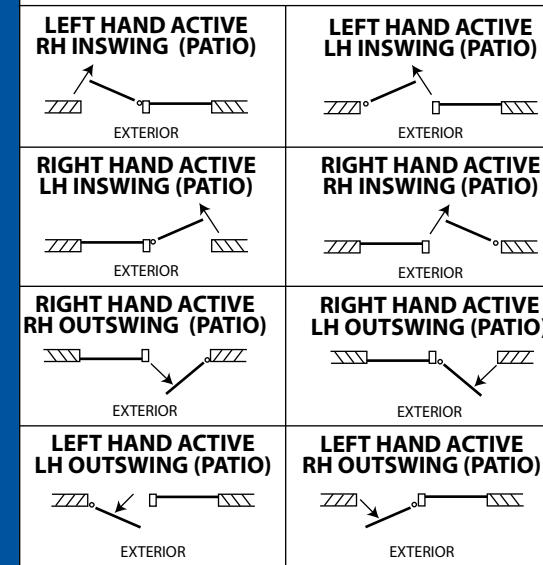

Available as either an inswing or outswing unit, the hinged operation eliminates security and performance problems often experienced with traditional sliding patio doors.

Codel's New Construction swinging Patio System is manufactured completely prehung, with an installed retractable screen, in your choice of either white or bronze.

- Composite bottom rail
- 12" wood lock block
- Polyurethane core

STEEL DOORS

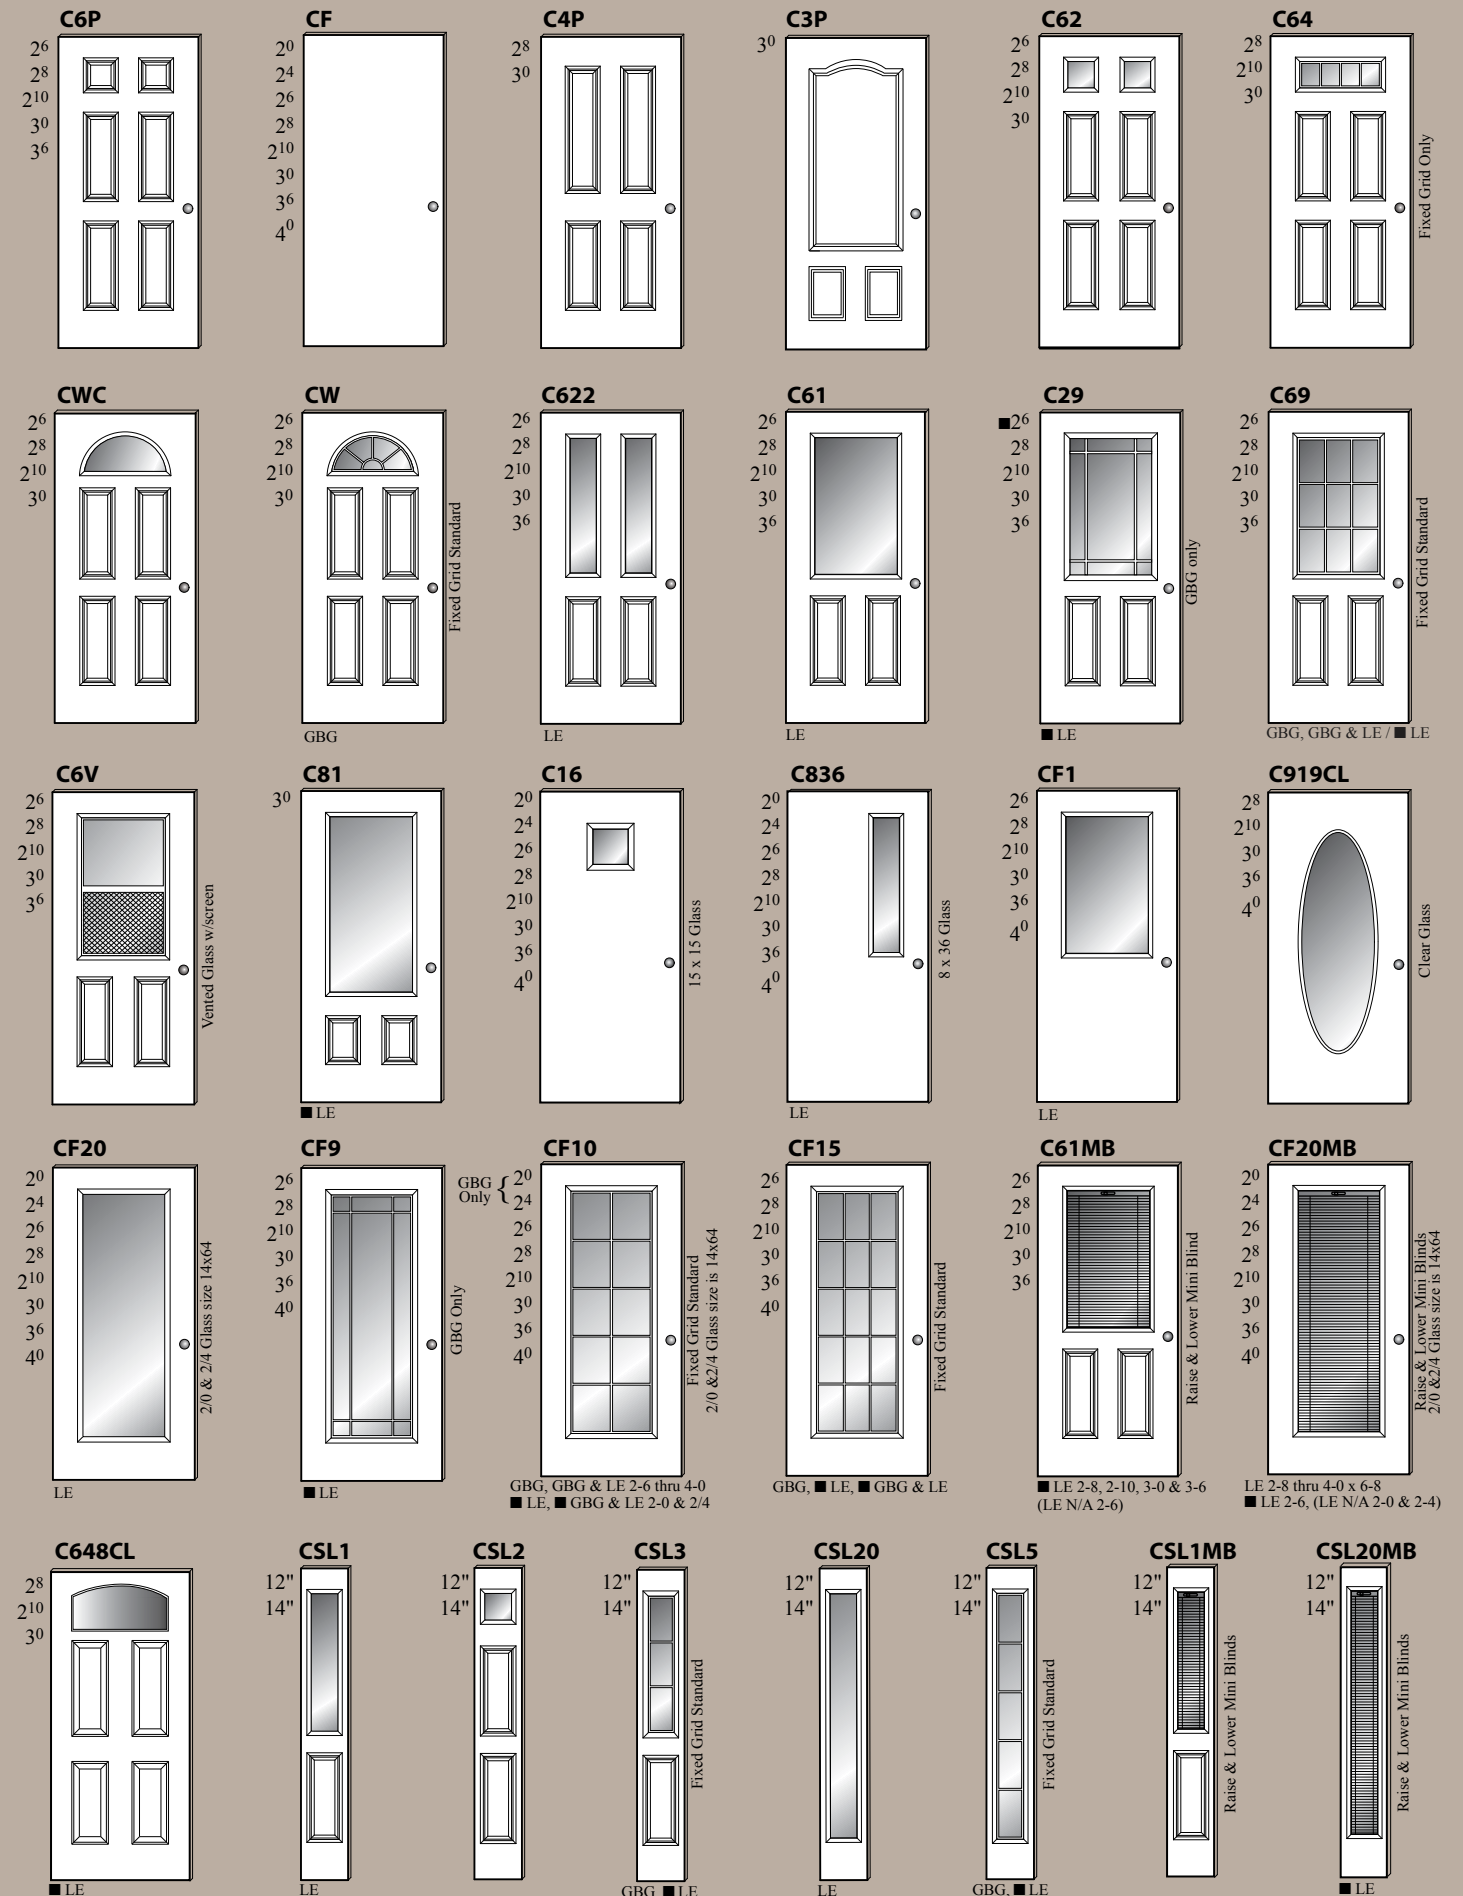

The wood-edge steel door series is a popular choice for new construction as well as remodeling projects.

The versatility and thermal advantages of a wood-edge door are combined with the durability of 24-gauge steel facings. Units are permanently held in place by the adhesion of the polyurethane core.

After assembly, doors are primed for superior corrosion resistance. Wood-edge steel doors are available with a *20-minute fire rating for all 6'8" doors up to 3'0" wide. (*Excludes doors w/lite kits.)

Thermal Performance values established in accordance with the International Energy Conservation Code (IECC) section 102.3

FAST-FRAME™

Introducing the Ultimate in Adjustable Steel Door Frames

FAST-FRAME'S advanced design adds a new dimension of flexibility and durability to Codel's steel entry door line. FAST-FRAME™ features closure kits with full 1" of adjustability to accommodate almost any variation in wall construction. This easy-to-install, user-friendly, kerfed steel door frame system is applicable to a full range of residential and commercial applications - wood or steel stud construction. FAST FRAME is engineered to meet the most stringent code requirements including structural, impact and 90-minute fire ratings.

C690 door.

SILLS
Standard Inswing
Thermally broken - 5 5/8" width
Optional extenders for larger wall sizes
Note: Not for use on outswing applications.

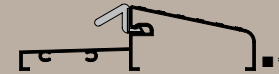

Handicap (ADA)
Double Slope 5" and 7" width

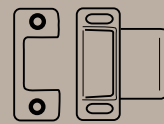

Tile Face 5" and 7" width

Bumper Outswing 4 1/2" width

Adjustable T-Strike
1/4" of adjustment allows for ease of field installations for proper door closure

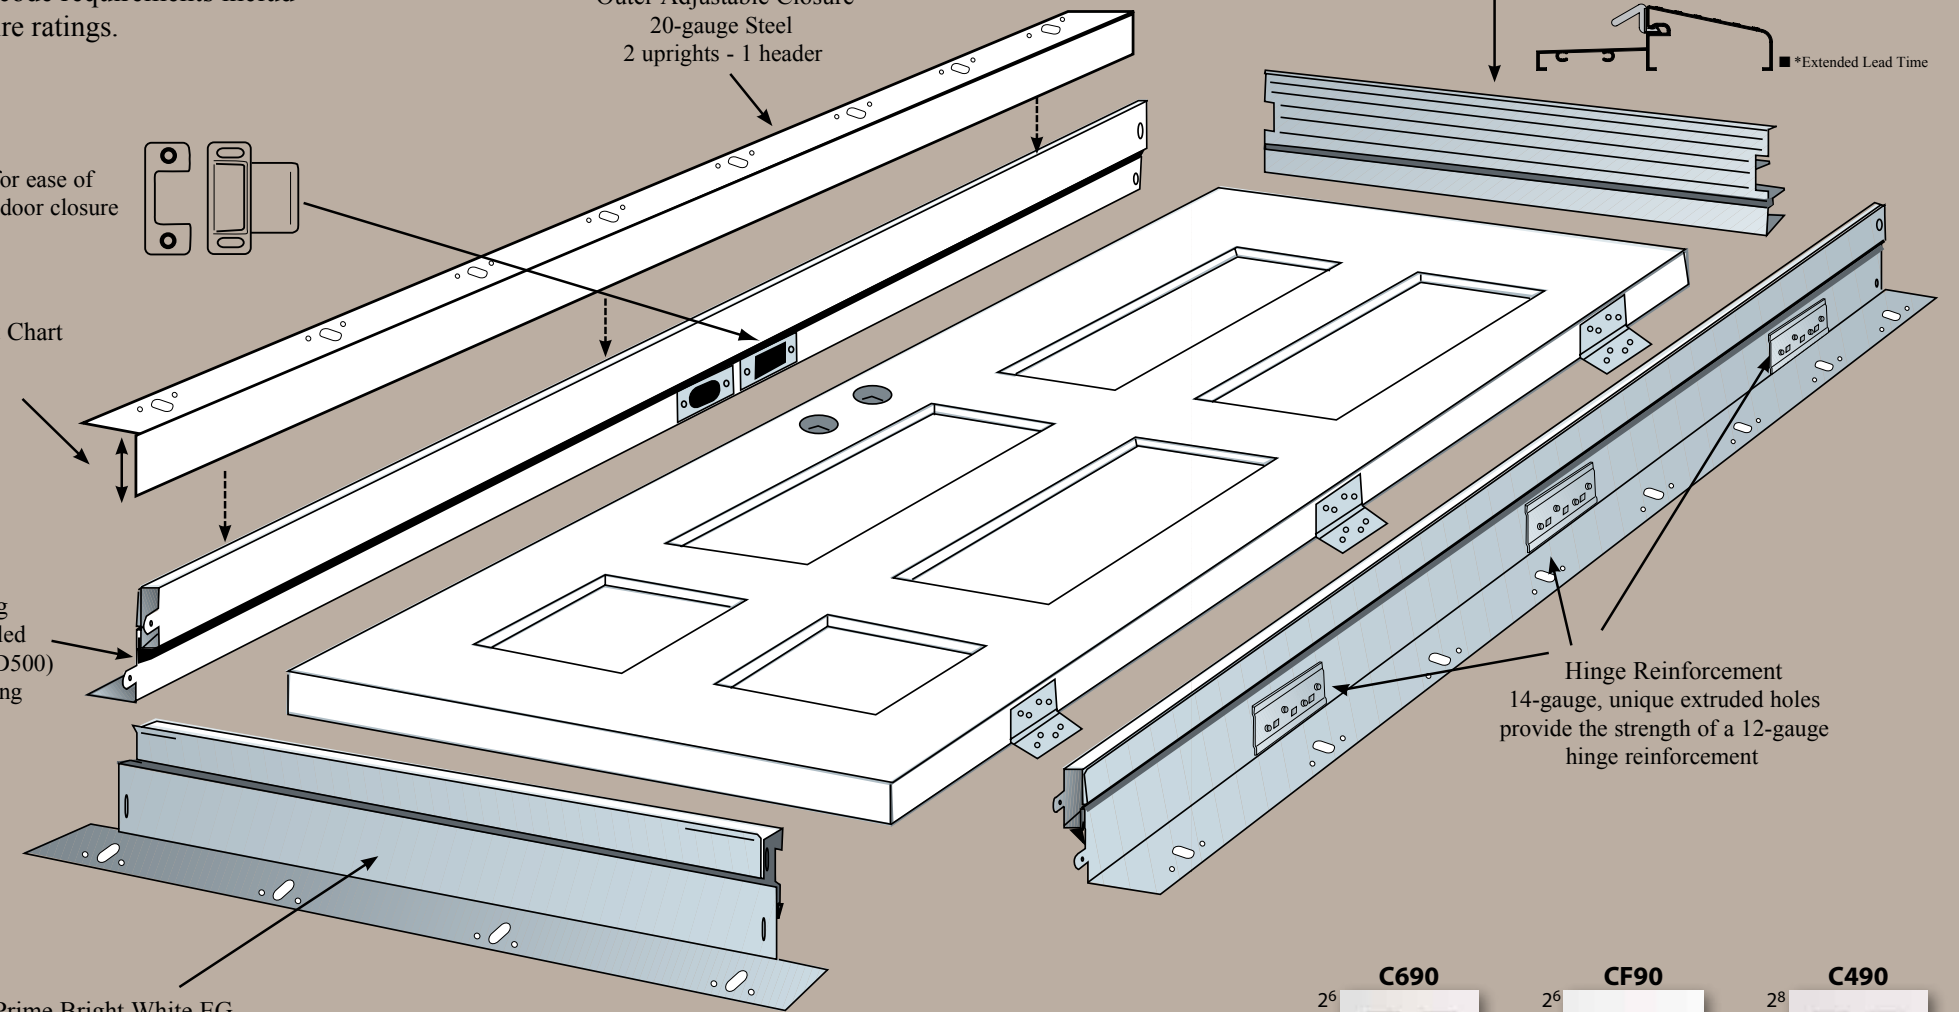

Closure Span Adjustment Chart

Wall Sizes
4 1/2" - 5 1/2"
5 1/2" - 6 1/2"
6 1/2" - 7 1/2"
7 1/2" - 8 1/2"
8 1/2" - 9 1/2"
9 1/2" - 10 1/2"

Weatherstripping
Schlegal foam-filled compression (QEBD500)
90 Min. Fire Rating

Prime Bright White EG
Galvanized 20-gauge steel to provide superior corrosion resistance and an optimal surface for painting

Outer Adjustable Closure
20-gauge Steel
2 uprights - 1 header

Hinge Reinforcement
14-gauge, unique extruded holes provide the strength of a 12-gauge hinge reinforcement

APPLICATIONS

- Multi-Family •Assisted Living •Motel/Hotel •House to Garage •Garage to Exterior

FIRE LABELS

90 Minute Fire Rating - up to 3'0" x 6'8".

CLOSURE TEST In a 90-minute application, the door will close and latch from 18" if the following Fast-Frame components are used:

- QEBD500 Foam-Filled Compression Weatherstripping
- Factory Sweep • Adjustable T-Strike • Factory Supplied Sills

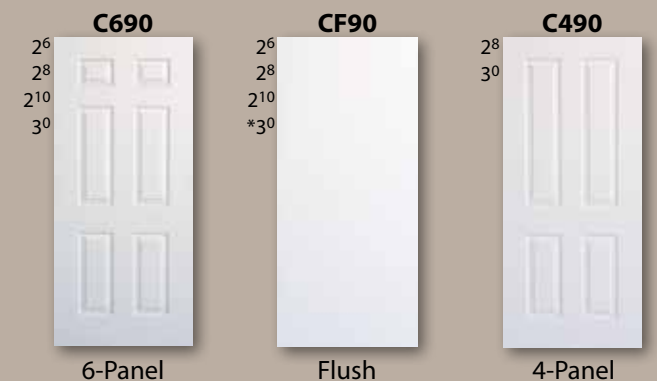

STRUCTURAL PERFORMANCE AND IMPACT RATING

Design pressure ratings are available for compliance with national, state and local wind load and/or missile requirements. Product approval under the Miami-Dade BCCO NOA or Intertek Testing Services/Warnock Hersey® programs.

Decorative Options for Rustic Doors

Clavos, hinge straps and speakeasies add an authentic touch to your Rustic door.

Straps & Clavos

Clavos

Codel offers clavos in 1-1/2" round or 1-1/2" square decorative black metal. The clavos are shipped loose so the customer can apply them on site in the design of their choice.

1-1/2" Clavos and 18" hinge straps can be added to Rustic doors.

Speakeasy

A Speakeasy adds a touch of old world charm. Codel offers a Seedy Reamy glass door Speakeasy as well as a solid one with a black door. Both seal tightly to prevent air infiltration.

(Size: 10" wide x 12" high.)

Rockwell

MultiPoint - Grip Series

TONGUE LATCH SYSTEM

Consumer friendly with 1/4 turn deadbolt lock indicator.

Rockwell

MultiPoint - Lever Series

TRIPLE LATCH SYSTEM

(No Dummy Set Available)

Grip & Lever Series Features

- Available for 6/8, 7/0 and 8/0 Doors
- Available in Satin Nickel and Oil Rubbed Bronze
- Conventional Deadbolt and Lever Handle Spacing at 5-1/2"
- Adjustable Strike Plates
- Dummy Sets Available for Double Door Units
- Deadbolts & Levers Meet ANSI Grade 2 Standards
- Limited Lifetime Warranty

Only Available on Fiberglass Door Units

HOPPE

Handle of excellence.

MultiPoint Locking Systems

Codel Entry Systems offers Multi-Point Locking Systems of the finest design, most precise machining and highest quality materials providing homeowners with a secure locking system stronger than traditional deadbolt locks.

Screw Support

Prevents flexing or bending of the gear for lifetime performance and smoother operation.

Mishandling Device

Prevents multiple locking points from accidentally firing and potentially damaging door trim. Fully field reversible.

Solid Stainless Steel Deadbolt

Highly corrosion resistant and stronger than traditional deadbolts.

Manual Tongue (Top & Bottom)

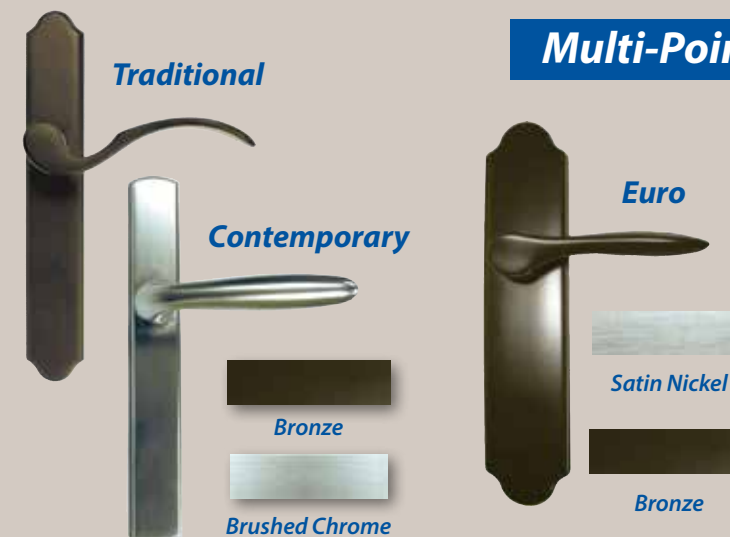

While offering security in the locked position, the manual tongue engages into the jamb or mull post and retracts when opened, giving a smooth, clean appearance.

Flush Bolts (Top & Bottom)

(Optional) Multi-Point is available for the inactive door. The flush-bolts operate by the handle on the in-active panel, sending the flush-bolts simultaneously into the head and sill, offering a smooth and easy operation and securing your entry door.

Multi-Point Hardware Options & Finishes

Features and Benefits

- 300 Series Stainless Steel-Highly corrosion resistant.
- Self Lubricating Parts - Last longer by eliminating the need to lubricate locks.
- Helps prevent doors from bowing and adds extra security at the same time.

- Only available on Fiberglass door units.
- Not available on cut-down units.

RETRACTABLE SCREENS

Hides simply, opens smoothly and closes securely.

**Standard & EZ-Fit Height Units in Stock.
Screen comes pre-installed on your
Codel prehung door and ready
to operate.**

**(7/0, 8/0 & Custom Height Screens Available
with Extended Leadtime.)**

Enjoy Fresh Air and the View

- For Inswing or Outswing units
- Provides a clear, unobstructed view
- Glides smoothly along tracks
- Easy operation and secure closure
- Latch and release handle
- In your choice of white or bronze

Available for double doors as well as singles.

Single door retractable screen.

RAISE & LOWER MINI BLINDS

Fully raise & lower blind with a light touch.

For sizes refer to pages 8, 10, 15 & 19.

No dusting. Blinds are sealed between tempered safety glass.

LIMITED
20
YEAR
WARRANTY

20MB Mini Blind.

DOORGUARD / JAMBGUARD / SILLGUARD

DOORGUARD was developed by Codel Entry Systems to protect both faces of the door slab during delivery, installation, and throughout the construction process.

The corrugated cardboard that is applied to each side of a Codel door slab protects the door from scratches, sheetrock and concrete mud, paint overspray and other jobsite debris. Applied with three heat treated plastic straps, DOORGUARD is very secure and does not affect the operation of the door, which can still be locked. Rain and humidity can deteriorate the cardboard and it does not protect the edges of the door from paint overspray. To combat these concerns, Codel has developed the next generation of DOORGUARD.

Once the DOORGUARD sheets are applied, the door enters a shrink wrap tunnel in which all six sides of the door slab are incased in clear plastic, ensuring added protection from the harsh Pacific Northwest climate. Installation recommendations are printed on the DOORGUARD.

The DOORGUARD package also includes SILLGUARD, JAMBGUARD, HINGEGUARD, and brickmould corner protectors.

JAMBGUARD is a steel reinforcement plate that is applied to the deadbolt area on the backside of the Codel door jamb. JAMBGUARD is standard on all single prehung units. The purpose of JAMBGUARD is to protect against intrusion by strengthening the weakest point of the door system. Unlike wraparound security plates, JAMBGUARD is concealed, accepting all types of lock hardware.

SILLGUARD is a durable plastic cover that is applied over the Codel door sill. The purpose of SILLGUARD is to eliminate job site debris from damaging the sill during the construction process. Once the project is complete, remove the SILLGUARD cover exposing a clean, defect free sill.

HINGE OPTIONS

Select a hinge that will match the finish of the hardware throughout the rest of your home. Codel offers a wide variety of hinge options, including; ball-bearing, solid brass, NRP and self-closing hinges.

Steel based hinges may develop rust if they are exposed to moisture. Codel recommends non-ferrous hinges on all outswing doors.

SILLS

High Dam Sills

The Codel high dam sill features exclusive unibody construction and weather-tough materials to deliver maintenance-free reliability, even in the most moist and harsh climates.

Patio Door and Continuous Sidelite Systems feature a high dam barrier for critical weather-tight protection where the jambs meet the sill.

Precision engineered rail adjusts upward and downward for sealed tight protection. Counter beveled, two-piece, press fit screws easily adjust with a common #3 Phillips screwdriver.

Composite vinyl rail and nose retain "furniture" finish appearance in damp, inclement environments without showing signs of weathering, fading or staining.

Composite base.

"Safestep" aluminum surface meets architectural, residential and commercial requirements.

Sills available in the following finishes:

Mill Finish

Bronze Finish

Satin Nickel Finish

Thermally Broken Aluminum Astragal

- The aluminum astragal helps to protect doors from warping.
- The foam rubber boot at the bottom provides a better seal at the sill.
- The bottom boot, along with the "keeper" at the top, keeps doors from rattling.
- Steel & Smooth Fiberglass doubles will get a WHITE astragal - Textured Fiberglass doubles will get a BRONZE astragal.

Hardware bags available in three finishes: US3, US26D, US10B.

(Outswing pairs include an aluminum security cover.)

Outswing Bumper Sills

The bumper sill forms a dam making it difficult for wind and rain to leak into the home. Outswing bumper sills are recommended when your door will come in contact with wind & rain.

The tight fit of the door against the bumper sill helps prevent wind & rain from entering the home.

Jamsill Guard

Jamsill Guard is an adjustable sill pan flashing for exterior doors designed to help prevent water damage from door leaks. This product has been time tested for over 25 years. It is able to accommodate most door applications in either 2x4 or 2x6 construction and is not visible after installation.

IMPORTANT:
Failure to install a sill pan will void any warranty against leaking.

WeatherGuard

COMPOSITE FRAME

Codel WeatherGuard Composite Frame System is an innovative new alternative to traditional wood jambs. This poly-fiber doorframe system combines all the strength and convenience of wood with enhanced properties that make it moisture, rot and insect resistant. This unique formulation guarantees that the WeatherGuard frame will not absorb or wick moisture and will never warp, splinter or rot.

The WeatherGuard product line is available in two varieties. White Cap is a smooth, semi-gloss white that can be painted or left unfinished to compliment the Codel Smooth Fiberglass door. Textured has an embossed grain that can be painted or stained to compliment the Codel Textured Fiberglass door. The advanced WeatherGuard system can be installed the same way as traditional wood jambs.

NEW for WeatherGuard is our patent-pending “Seams-Rite” spline that enables the brick-mould to be applied to the jamb without using nails. Besides eliminating nail holes, “Seams-Rite” ensures a continuous water barrier. Also new, is an optional nailing flange.

WeatherGuard

COMPOSITE FRAME

Features & Benefits

- Poly-fiber composite jamb system is an attractive, affordable, and low maintenance option to traditional wood.
- Closed cellular structure is a unique formulation that ensures product will not warp, split or absorb moisture.
- Greater screw holding power than wood.
- Installs the same as traditional wood jambs.
- Available in smooth semi-gloss white cap and stainable textured embossed.
- Matching mullposts offering sidelite and transom capabilities.
- Installation and finishing recommendation label applied to every frame.
- Limited lifetime warranty.

CODEL

COATINGS

We Finish What We Start!

Stain Colors

Have any Codel textured fiberglass door stained your choice of 13 beautiful colors.

Medium Oak Light Oak Cinnamon Cedar

Red Cherry Mahogany Walnut

The stain colors shown above are available on ALL Standard Oak, Barrington & Rustic Grained Textured Fiberglass doors. (NOT available on Fir Grained doors.)

Ginger Nutmeg Clove

Available on Fir-Grain “Belleville Collection” Doors (See pages 15, 66 & 67)

Caramel Toffee Chocolate

Available on Fir-Grain “Flush-Glazed Craftsman” Doors (See pages 68 & 69)

Carbon Paint

Medium Oak

Artisan ART-430 door with ART-230 sidelite.

Paint or Stain, We've Got You Covered!

Paint Colors

Have any Codel smooth or textured fiberglass door painted your choice of 16 colors.

Cougar Tomato Hunter Jasper Carbon Iron Flint Navy
Pacific Khaki Olive Espresso Truffle Sand Bright Ivory

How come the color on my product doesn't look exactly like it does in the catalog or website?

Due to the limitations of photography, there is no guarantee that your product's colors will have the same appearance as they do in print or online. We always recommend you see an actual sample before deciding on a color choice. Contact a Codel dealer to request a color chip sample.

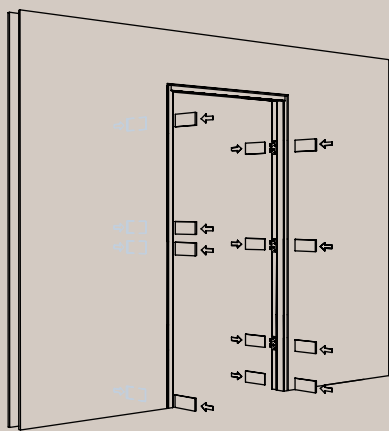

PREHUNG DOOR INSTALLATION

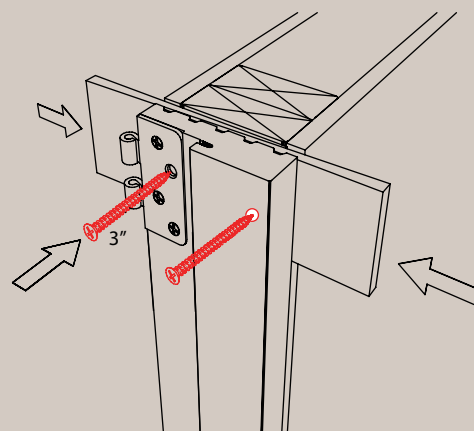

Wood & WeatherGuard Composite Frames

The proper installation and maintenance of a prehung door unit is absolutely critical to its performance and longevity. Without proper installation, a door unit will not fulfill its proper role in a home and can be a constant burden. Splashback from the patio deck is a major source of leakage and a prime cause of rot and water damage. Protect unit by immediately sealing all six sides of wood frame, raising unit above exterior deck level 6", providing a 24" (or greater) overhang, and by sloping the deck outward.

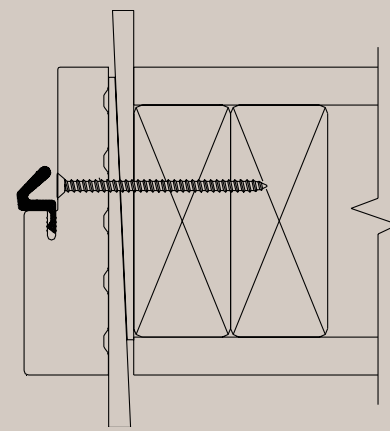

- The frame opening must be level, plumb and square.
- The sill must be level and provide support for the door.
- Install a sill pan or run a non-hardening caulk in 3 separate beads under the sill and along the bottom of the jamb legs.
- The unit should be installed in a closed position. Nail or screw temporarily, as position may need to be adjusted.
- There should be an 1/8" gap between the operating door and the header. Shim to achieve proper clearance.
- Place shims behind jamb leg at top, bottom and each hinge. Shim at same locations, behind strike jamb leg. Shim behind head jamb as needed.
- Nail or screw through shims into wall supports.
- Insulate all voids and caulk door unit on all exterior finish areas.
- Insulated glass will scratch easily. Clean carefully. Warranty does not cover scratches in glass due to cleaning.

Shims must be placed behind the jamb at each hinge, latch and deadbolt location.

Wider jamb widths may require additional fasteners.

The screws that don't go through a hinge or strike plate can be hidden behind the weather-stripping.

***IMPORTANT! Failure to install a sill pan will void any warranty against leaking.**

FINISHING RECOMMENDATIONS

PAINT PREPARATION FOR ALL CODEL DOORS	Steel* Steel doors are primed.	Smooth Fiberglass* Smooth Fiberglass doors are unfinished white.	Textured Fiberglass* Textured Fiberglass doors are unfinished tan.
PREPARATION ■ Remove weatherstrip, door sweep, hinges and lock hardware. ■ All installation nail and screw holes should be filled with a quality painter's putty or caulking. ■ Apply a small bead of caulking between the jamb and brickmould. Allow to dry.	✓	✓	✓
CLEANING ■ Before applying a finish paint, clean the door with detergent and water or TSP or other water borne products. Wipe clean and dry. ■ Do not use industrial type fast dry solvent base materials, such as mineral spirits or lacquer thinner to clean door surfaces or a paint thinning agent as they may leave a residue on the door surface that is incompatible with latex coatings.	✓	✓	✓
SANDING ■ Scuff sand for better adhesion using 150-180 grit sandpaper prior to painting. Wipe door surface clean after sanding. Do not sand textured fiberglass doors.	✓	✓	N/A
ACRYLIC COATING SYSTEM (Steel Doors Only)			
PRIMING ■ The steel door has a factory applied waterbase prime coat.	N/A	N/A	N/A
TOP COAT ■ Apply one or two coats of acrylic emulsion latex paint.* ■ Do not use paints containing lacquer, linseed oil, or alkyd solvents.	✓	N/A	N/A
WATER BORNE COATING SYSTEMS (Smooth & Textured Fiberglass Doors Only)			
PRIMING ■ Use a high adhesion bonder/sealer type primer. For best results primer can be sanded with 3M Green paper 220 grit designed for use with latex coatings. (Do NOT sand textured fiberglass doors)	N/A	✓	✓
TOP COAT ■ Apply one or two coats of 100% acrylic latex enamel.*	N/A	✓	✓
OIL BASE COATING SYSTEMS (Smooth & Textured Fiberglass Doors Only)			
PRIMER ■ Use a high adhesion bonder/sealer type oil base primer.	N/A	✓	✓
TOP COAT ■ Apply one or two coats of alkyd oil enamel.	N/A	✓	✓
<ul style="list-style-type: none"> ■ Direct sunlight & extreme temperatures may cause: <ul style="list-style-type: none"> -Door to experience thermal bow. -Door glass moulding to expand/contract, exposing sealant, paint line, and cracking paint finish. ■ Doorglass moulding; apply a bead of quality caulking between frame & door after finish coat has cured or if door is left unfinished. ■ Primed & Hemlock jambs and brickmould must be finished prior to installation on face, both ends, and all edges. WeatherGuard frames do not require finishing. For finishing refer to label on jamb. 			

*If using latex paint it is important to follow the paint manufacturers min. temperature recommendations.

WeatherGuard Finishing Recommendations

Painting: White Cap & Textured Embossed Frame

Surface Preparation:

Wipe the frame thoroughly with appropriate water borne cleaner/degreaser for PVC type products to remove dirt, grease and other residue from the surface. Rinse the jamb off thoroughly and allow to dry completely before applying paint.

Coating:

Apply two coats of exterior enamel paint as per manufacturers technical data and label instructions for use with PVC type products. Kelly Moore DuraPoxy, Sherwin Williams SuperPaint A85 Series latex enamel and Parker Paint Speed Dri oil enamel are recommended by these manufacturers for use with the WeatherGuard frame without priming.

Notes:

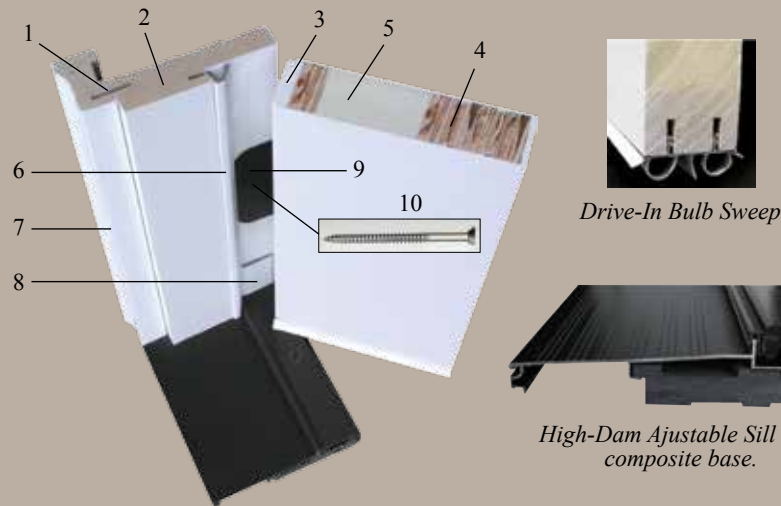

- Lightly scuff sand.
- Do not use paint thinner or other petroleum distillates to clean the frame if a latex enamel topcoat is to be applied.
- Follow manufacturers instructions regarding dry time before re-coating.
- WeatherGuard Frames do not require painting to maintain the warranty.

STAINING: Textured Embossed Frame

It is recommended that a gel stain designed for fiberglass doors be used for this purpose. Follow the manufacturer's instructions on the can. (Gel stain can be found at your local paint store or home improvement center).

THE "CODEL" WAY - PREHUNG DETAILS

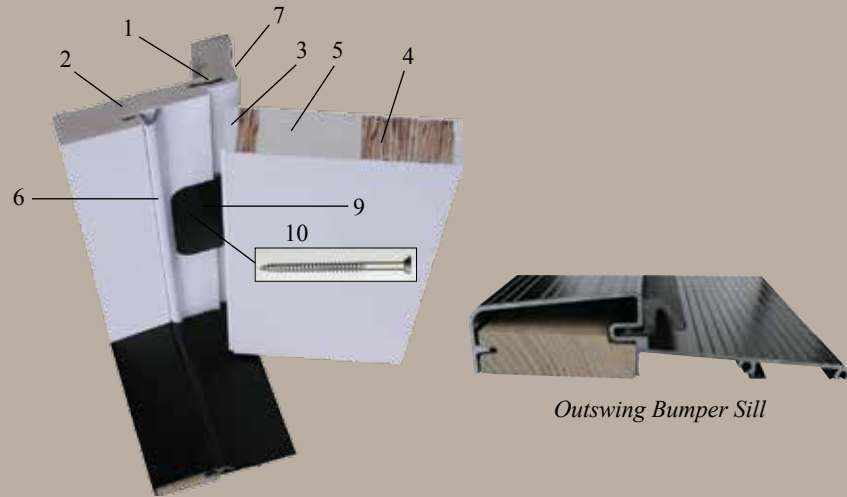

Inswing Adjustable Sill

Drive-In Bulb Sweep

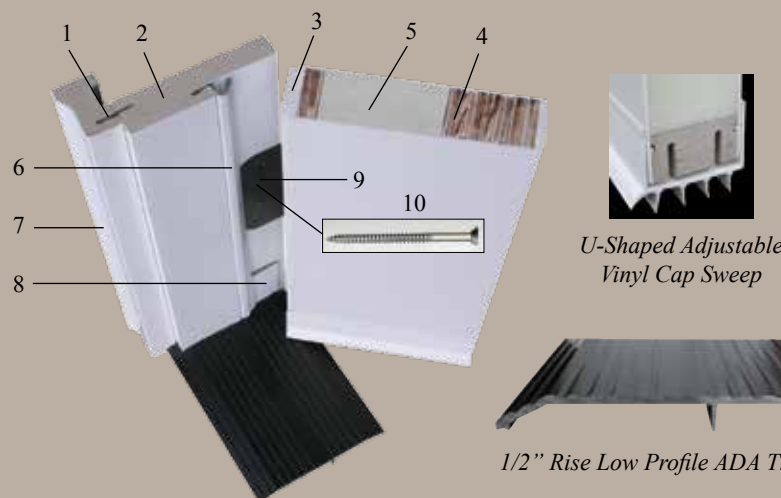

High-Dam Adjustable Sill with composite base.

Outswing Bumper Sill

Outswing Bumper Sill

Inswing Low-Profile Sill

U-Shaped Adjustable Vinyl Cap Sweep

1/2" Rise Low Profile ADA Threshold

1. **"Seams-Rite"** - Spline attaching brickmould with NO nails. (Available on WeatherGuard Only)
2. **WeatherGuard Jamb** - Unique poly-fiber door frame system that will not absorb or wick moisture and will not warp, splinter or rot. (Optional)
3. **PVC Edge** - To protect against water.
4. **3-1/4" LVL Stile** - Continuous 3-1/4" lock rail extending the full length of the LOCK SIDE, keeping the door from bowing.
5. **R15.49 Panel Core** - High density poly-urethane core provides an energy efficient door free of CFCs.
6. **Q-Lon Weatherstripping** - Compression weatherstrip.
7. **WeatherGuard Brickmould** - All composite brickmould. (Optional)
8. **Corner Seal** - Extra protection against air & water infiltration.
9. **4" Hinge** - 5/8" radius steel based hinge available in a variety of colors to compliment any decor. (Codel recommends non-ferrous hinges on all outswing doors.)
10. **2-3/4" Installation Screw** - Secures the jamb into the wall stud. (Provided)

Paint or Stain, We've Got You Covered!

Paint Colors

Have any Codel smooth or textured fiberglass door painted your choice of 16 colors.

Cougar Tomato Hunter Jasper Carbon Iron Flint Navy

Pacific Khaki Olive Espresso Truffle Sand Bright Ivory

How come the color on my product doesn't look exactly like it does in the catalog or website?

Due to the limitations of photography, there is no guarantee that your product's colors will have the same appearance as they do in print or online. We always recommend you see an actual sample before deciding on a color choice. Contact a Codel dealer to request a color chip sample.
