

MODEL 538A

COMPACT HORIZONTAL AIR CONDITIONER with Puron® Refrigerant

Preferred[™]
SERIES

Preferred, Ultra-Compact

Bryant Delivers a Tradition of Comfort

Since 1904, Bryant® has delivered a tradition of comfort by doing whatever it takes to create products of superior quality and performance. Today, as U.S. homeowners become more aware of environmental issues in their everyday lives, Bryant offers an environmentally sound choice for ultra-compact, extra-quiet cooling: the Model 538A horizontal air conditioner with Puron® refrigerant.

The Bryant Model 538A provides worry-free comfort that won't deplete the Earth's ozone layer. It delivers up to 15 SEER cooling efficiency. It installs just about anywhere with a compact footprint and unique, front-to-back airflow design. Designed, built and backed by the most trusted name in the business, and installed by your trusted and

professional Bryant dealer, the Model 538A horizontal air conditioner with Puron® refrigerant provides comfort you can enjoy every cooling season.

So Quiet and Compact, You Might Forget It's There

Relaxing in the comfort of your home is easy with the Model 538A because this is one quiet air conditioner. Our unique, front-to-back airflow design moves air efficiently through the unit with less turbulence. The result is extra-quiet operation as low as 67 dBA. That easily meets most noise ordinances with operation as quiet as a basic table-top fan.

This design also allows us to make the unit more compact so it takes up less space in your yard. It can be installed to save space on a roof, a deck, under a balcony, on a wall or other locations. It can be stacked for zoned or larger cooling capacity applications. And, because it draws air into the unit and exhausts towards your house, it won't affect nearby shrubs or blow air across property lines.

The 538A installs only 6" away from your home allowing total integration with structure and surroundings.

Cooling

Peace of Mind

To the original owner, the Bryant Model 538A air conditioner is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties, which may include labor.

*Warranty period is 5 years if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at bryant.com for complete details.

Performance

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.

Environmentally Sound Operation

With the Model 538A, you are joining the growing ranks of homeowners who choose environmentally sound Puron® refrigerant. It's an important consideration because Freon®-22*, the refrigerant most commonly used in evaporator coils, is gradually being phased out of existence due to concern over the Earth's ozone layer. In the automotive industry, a similar phase-out of Freon®-12* caused costs for that refrigerant to jump by an eye-popping 800% in some areas. By choosing the Model 538A horizontal air conditioner with Puron® refrigerant now, you are helping preserve the ozone layer while protecting yourself from potentially expensive service costs down the road.

Efficient Design, Reliable Operation

The Model 538A is your trusted source for comfort during the cooling season. Delivering up to 15 SEER cooling efficiency, it can provide significant savings on monthly cooling costs compared to an older 8 or 10 SEER air conditioner you may be replacing. The Model 538A also beats the heat with an attractive, durable cabinet on the outside and rugged components on the inside. The DuraGuard™ protection package with baked-on powder paint and heavy-duty coil guard not only looks great, but protects the unit's integrity with superior corrosion resistance. Inside, copper and aluminum components and protective features ensure solid performance season after season.

*The registered owner of Freon is E. I. DuPont de Nemour & Co.

COMPARATIVE SOUND RATING

▲ **The Model 538A operates at sound levels as low as 67 dBA, about the same as your kitchen refrigerator.**

Bryant's horizontal air conditioners can be stacked for greater output and zoned comfort control.

Home Comfort Components

PURON® REFRIGERANT

Bryant's environmentally sound refrigerant keeps you cool without depleting the Earth's ozone layer.

1 ENVIRONMENTALLY SOUND, EXTRA-EFFICIENT

Our scroll compressor is designed for use with Puron® refrigerant to provide quiet, smooth-operating comfort and years of environmentally sound, trouble-free performance.

2 RELIABLE PERFORMANCE

Bryant's copper tube/aluminum fin coil maximizes transfer of heat outside your home to ensure cooling efficiency. Coil materials and design minimize chances for rust and corrosion for lasting performance.

3 QUIET OPERATION

Front-to-back, low-velocity airflow creates less turbulence and less noise while moving air away from shrubs and neighboring property lines.

4 LASTING COMFORT

High and low pressure switches and the filter drier protect the unit's most important single component: the compressor.

5 BUILT TO LAST

Bryant's DuraGuard™ protection package ensures lasting durability and good looks. Three key elements to this package include galvanized steel cabinet, heavy-duty wire coil guard and baked-on powder paint.
