THE STORY OF ARCHGARD AND THE INSPIRATION OF HEATING

INSPIRATION

Fire has played a vital role throughout history, ensuring our survival. The fireplace has always held a special place in the hearts and homes in North America. It is the focal point of the home and provides the heat, light, and security we all need – especially during those cold winters and long nights with heavy snowfall and icy winds.

DRIVE

Passion has been the drive behind every fireplace Archgard has built since it was established over 30 years ago. Quality, modern technology, and design has been our recipe for success. Quality was our promise then, and quality is our promise today. Our fireplaces combine old traditions with modern functionality. We create products that give you the same feeling you get while sitting in front of a traditional wood burning fireplace yet satisfies even the most stringent demands for clean combustion. This all leads to the Archgard experience: enjoy your unparalleled flame with a clear conscience.

AND SO MUCH MORE....

The fireplace is no longer simply a source for heat but rather a central part of our homes. Our fireplaces are designed with clean lines and a focus on providing a perfect flame. We offer a wide range of products and accessories to meet any personal tastes. The result of our endeavors are timeless classics that form a natural gathering point in modern homes.

Traditional wood burning fireplaces can be dirty, dangerous, and harmful to the air we breathe.

Upgrade your existing wood fireplace with a safe, efficient, and convenient way to heat your home. Choose from our comprehensive range of alluring gas inserts to add warmth and ambiance to your home at the press of a button.

For more information, pictures, and videos visit archgard.com

* See the manual for more information.

All inserts come standard with barrier screens which attach to the door with very little effort.

All Archgard gas inserts offer an unparalleled panoramic Wall to Wall Flame. Our prolific design also offers a fire that begins at the hearth rather than being located above a valve control area in most gas inserts. The Archgard Full Frame Flame fills the firebox to create the ultimate centerpiece for your space.

* See the manual for more information.

All inserts come standard with barrier screens which attach to the door with very little effort.

Customize your gas fireplace insert to match your space with the choice of three interior linings:

Modeled after brickwork found in La Citadelle de Quebec, the Quebec City Grey Brick provides a clean and alternative look while adding some old-world charm. The Quebec City Red maintains that old-world charm while bringing a more traditional look. The Eternal Flame Reflective Ceramic Glass liner outlasts the typical porcelain and enhances your fireplace experience by adding an endless flame to the backdrop of your fireplace.

RADIANT HEAT VS CONVECTION HEAT

Radiant heat is the intentional transfer of radiant energy from your Archgard fireplace directly to objects and people within the room. Like the sun on a cool morning or sitting around a campfire, the surrounding temperature may be cool, but you are warm and comfortable because of the radiant heat that is transferred from the source directly to you.

Convection heat generates an air current to help heat the air in the room quicker and push heat out to fill even larger spaces. This process is improved by using the standard efficient six speed heat distribution fan* which is operated using your standard remote control.

Radiant heat is known to be more efficient than convection heat due to differences in the way each system heats your home.

Archgard gas inserts give you the best of both heat types as all Archgard gas inserts are both radiant heaters AND convection heaters.

RADIANT HEAT

CONVECTION HEAT

*The distribution fan is optional on the 22-DVIE22LN

WORLD'S FIRST DYNAMIC START ADVANTAGE

Our engineers teamed up with the industry's lead electronics producer to develop the all new Dynamic Start Advantage control system. The new control is absolutely the most reliable, user friendly, and safest start system ever produced.

This system will start the fire slowly and build it up after a draft has been established. This process helps ensure a more reliable start, reduces any condensation on the glass door, and helps to reduce the pinging and clanging sounds common to other gas fireplaces on startup.

CONTINUOUS PILOT ON DEMAND

Archgard's efficient gas fireplace inserts are designed to help save the environment while saving you money! The Continuous Pilot On Demand ignition system is a safety feature which also saves energy by automatically turning the pilot off after seven continuous days without use.

This system allows you to live your life without consideration for whether you've left the pilot on or not. Whether you've gone on vacation or it's those warm summer days, the pilot will automatically turn off until you need it. Simply turn on the fireplace to start the seven day timer again.

DECORATIVE INSIDE TRIMS

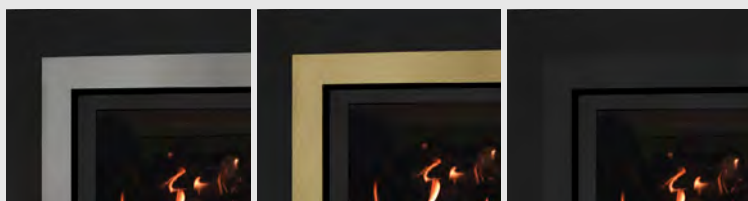

INSERTS

17

One look doesn't necessarily fit all homes. Therefore, Archgard direct vent inserts offer dozens of front and door options. Add nickel, gold, or black trims to personalize your fireplace and achieve that perfect look you've been seeking.

Decorative trims are used with the 22-DVIE22LN and 36-DVIE40LN. For other models, use a Hinged front.

SUPERIOR RADIANT HEAT

The doors for Archgard’s gas inserts are not simply beautiful to look at but functional as well. Open the doors and sit by your fire to enjoy more radiant heat on those chilly winter nights or close the doors and allow the heat distribution fans to push the heat to the farthest corners.

Caution: with doors open, the glass is hot and could cause burns.
