## SURROUNDS

All Archgard inserts require the addition of one of our stylish, decorative surrounds. They have a dual role of function and fashion; they hide the seam between your Archgard insert and existing masonry fireplace, while adding timeless elegance to your room.

Beveled Surround Kit

Large Surround Kit  
**LSK**

## TRIMS

Depending on what other accessories you have chosen, you may want to complete the look of your fireplace with one of our decorative trims. While each surround comes with the standard black trim, if for example you have chosen the nickel overlay for your fireplace, you may want to complement it by adding the nickel trim kit.

## FORGED IRON FRONTS (FIF)

Archgard Forged Iron Fronts blend the rustic look and feel of a traditional wood-burning fireplace with the modern technology of a gas fireplace. Applying our many years of experience, we individually handcraft each FIF to ensure you receive a one of a kind product. Unlike many decorative fronts in the market, our FIF's are durable and will stand up to the physical demands of the consumer, without sacrificing style and design.

## LOOKS GOOD OFF &amp; ON!

It's easy to see why the design of our FIF's will enhance the appearance of your fireplace. Whether you choose an Arch, Square or Bow, our FIF's with their hammered powder coated finish, will give your room a warm, inviting look even when your Archgard fireplace is turned off. However, the true magic of the FIF comes to life when you turn on your fireplace. The mesh screen softens the edges and blurs the lines between a real fire and gas fire, while the finish of the FIF surround creates a smooth and stylish transition for your Archgard fireplace.
